

Choose the best printed mailing materials online

Yes, it's a fact that paper is a major utility in our everyday lives and even though the trend now is towards paperless work and offices, paper still retains its charm and usefulness. Giving value to printed mailing materials, i.e. paper envelopes, carton envelopes, mail packaging, carton mailers and plastic envelopes and pockets in Bulgaria and markets in EU, Russia and the Middle East, Polymail is driving fast on its growth path being a trademark of Polycart, Bulgaria. Today, Polymail caters to the Bulgarian government and also produces around 200000 pieces of items for the markets described above, and the envelopes from Polymail are prepared from 50gsm paper, up to 6 mm thick corrugated material or 3 mm solid carton board without compromising on quality or delivery time. All these materials are supplied at reasonable rates and to be precise, the customers include trading companies, mailing houses and envelopes over printers.

It helps to send your things through Polymail's printed mailing materials

Polymail makes around 10, 0000 pieces of paper bags, paper pockets, envelopes and shopping bags catering to the EU markets and as said, paper envelopes are a major product of them. They offer these products as part of a complete mailing solution which also includes carton envelopes, postal tubes, mailing boxes, colored greeting card envelopes, stationery envelopes and shipping fill-in forms for couriers among others. And, complete mailing packages like billing statements, cardboard packages, catalogue mailings, corrugated boxes for online retailers, brochures and advertising materials are also offered from Polymail's counters.

Carton envelopes catering to the mailing, postal and courier markets are another innovative product that Polymail deals with and these envelopes come with all their needs fulfilled like full-color print, silicon strip on flap, window, barcode etc. In addition, inserting materials of all types, labels, brochures, catalogues, and title letters are also given, all these coming at reasonable prices. Upon needs, carton boards up to 3 mm, test liner materials up to 230 gsm and cardboards up to 800 gsm, or envelopes with some other materials can also be made.

Other specialties of Ploymail are envelopes and mailers developed from corrugated materials like book mailers, postal boxes and CD mailers etc and this entity's portfolio for envelopes also covers archival boxes that are sent in the mail, food packaging solutions, shipping boxes and pads, and all other special corrugated mailers that need lamination on top of the corrugated material.

In addition to all the above, plastic HDPE and LDPE envelopes and pockets are also the products of Polymail and orders for around 50,000 pieces per design are accepted.
