K & A AUTO: TEAM OF EXPERT MECHANICS

If you've chosen us to be your car mechanic Clarence Park, you'll find that we're more than just mechanics. We've spent years learning about cars and the different ways to increase their longevity. While keeping on top of your services is no doubt the most efficient way to do this, there are also a few things you can do post-service to look after function and exterior.

We've decided to share a list of our recommended tips for keeping your car in top form all year round, some of which are easier than you think. We don't expect all our clients to know everything about cars, so if you ever have any questions about what you can do for your car, just have a chat with a member of our experienced and knowledgeable team. This is the perfect opportunity to pick K & A Auto to be your car mechanic Clarence Park.

TIPS AND TRICKS FOR TIP TOP VEHICLE FORM

Although our car mechanic Clarence Park will check during a service, car owners should also regularly track their fluids to avoid friction, overheating, and for overall efficient functioning. How often these fluids need changing or filling will vary according to your car make and model. However, we recommend checking every couple of months. Tyres are also integral to the functioning of your car. So, there's a couple of things you can do to keep them performing well. The first is to check your tyre pressure, as this will not only help with fuel economy, but will also help your tyres be more responsive to the road. Secondly, we recommend keeping an eye on the tread, as bald tyres can pose a major hazard on wet roads. You may need a car mechanic Clarence Park to help you check your tyres when they're worn, so keep our number on your fridge!

OUR TIPS AND TRICKS CONTINUED

While it may not seem relevant to car performance, keeping your car clean can prevent long-term damage to the interior and exterior of your car. Bird poo, salt, tree sap and sun are a few of the external factors which can lead to paint damage, rust and corrosion. Crumbs and dust that are stuck in your interior can also lead to sticking and staining, so a quick spruce every now and then can work wonders. For protection from exterior elements we recommend you avoid parking under trees when you can and opting for undercover parking. The final tip we offer is to let your car warm up before taking off, particularly in the cooler weather. Idling for a minute or two will allow your engine oil to warm and disperse to prevent friction. Don't ignore the bangs and rattles! Book your next service with the best car mechanic Clarence Park.
